

The rescheduled zoning board hearing on the above-ground gas tanks at Dauphinais Concrete on Berkley Street is on Thursday January 25th at 6pm at city hall in the council chambers. The company wants to install two 1,000 gallon gasoline tanks and one 9,995 gallon diesel tank.

Join Clean Air taunton in testifying at the meeting about your concerns for the project. Every voice matters and you can make a difference. Clean Air Taunton is concerned because the concrete aggregate plant has not considered the community's well being in the past and in the present. We are concerned that they will not do right by our community due to the past history of the plant. We hope to see you Thursday at the hearing.
